EXPERIENCE

Manufacturing Software Engineer - LSP USA, LLC

Apr. 2026 – Present

- Designed HTML/CSS forms with JavaScript input validation, reducing completion time for **100 daily reports from 10 to 3 minutes**.
- Built a mobile-first NCR Assistant with Node.js, PostgreSQL, and AWS RDS, replacing manual typing with assisted report generation.
- Engineered and supported manufacturing software systems by debugging PLC/HMI integrations, improving production workflows, and building operator tools.
- Leveraged Claude for agentic development and the Anthropic API for bilingual report refinement, supporting **2,500+ production records**.

Software Engineering Research Assistant - SDLE Research Center

Oct. 2024 – Oct. 2025

- Improved a distributed data platform using Hadoop and HBase, helping researchers process data from 500+ buildings faster.
- Optimized HBase NoSQL queries across a distributed Hadoop cluster, cutting retrieval time **30%** and supporting an **85× pipeline speedup**.
- Mapped EDIFES architecture, then version-controlled **Python** and R changes with Git through Bitbucket to reduce integration risk.

PROJECTS

CravingRAG

Jul. 2026 – Present

- Architected a **Snowflake-native RAG pipeline** translating sensory cravings into explainable recipe recommendations.
- Loaded 13,501 Hugging Face recipes with dlt, generating sensory profiles and 1,024-dimensional embeddings through Cortex AI.
- Retrieved Top-K recipes via vector cosine similarity, generating grounded explanations without a separate vector database.

Event Compass

Aug. 2025 – Dec. 2025

- Co-led a five-person team building a React, Supabase, and OpenAI event-planning platform with dashboards, AI-generated plans, and chat copilots.
- Implemented **18 REST API endpoints** powering four React analytics dashboards.
- Refined Python text analysis to preserve 46 campus phrases, improving theme accuracy.

Pantry AI

Jan. 2025 – May. 2025

- Co-developed a React, Supabase, and OpenAI app generating recipes, scheduling meals, and tracking expiring pantry items.
- Migrated Firebase into seven Supabase, supporting connected pantry, recipe, meal-planning, grocery, and social workflows.
- Automated CI/CD and integrated 18 Spoonacular REST routes, earning **3rd place among 20 teams**.

EDUCATION

Case Western Reserve University

Cleveland, OH

- *B.S. in Data Science, Minor in Mathematics*

Aug. 2022 – Jan. 2026

SKILLS

- Python, R, JavaScript, TypeScript, HTML, CSS, RESTful API, PostgreSQL, NoSQL, AWS, Git, Claude
